- Start CANDoo Professional by going to start menu and launching CANDoo Professional
- Bottom left of the CANDoo Professional software shows the current status

-
- After vehicle is connected, select Vehicle menu option and click read

Vehicle Connection:

Typical Connections: (refer to Service Manual for the model you are working on for exact details)

Slingshot

- Connect the USB cable to the PC and the CANDooPro Vehicle Diagnostic System box, and startup CANDooPro application.
- Connect the 8-pin Diagnostic Cable to the CANDooPro Vehicle Diagnostic System box
- Connect to the 8 Pin connector on the vehicle, located in the driver side foot well, above the lower steering wheel cover below the ignition switch.
- Ignition Key must be ON

Faq's:

- CANDoo Professional checks for updates on startup, if there is an active internet connection.
- If you are using wireless and get out of range, it can cause CANDoo Professional to freeze up while trying to connect to the website on startup. We suggest disabling the wireless on your laptop if you are moving out of wireless range.
- Make sure you have a fully charged battery, failure to do so can cause data corruption!
